PROJECTS

Personal Website (alexpan.me)
Created a website from scratch using HTML, CSS, and Javascript, with custom backgrounds and buttons from Adobe Illustrator. Showcases my coding projects, design portfolio, and contact info.

Generative Python Art
Used the Nodebox Mac Application to generate randomized visual displays from Python code. Draws from the external Nodebox libraries to create computerized renditions of bokeh pictures and fire.

ACADEMIC PROJECTS

University of California, Berkeley, Berkeley, California USA

Text Editor (Data Structures course)
Created a text editor using the external JavaFX library. Features included cursor and mouse input, word wrapping, open & save, undo & redo, scrolling, and window re-sizing. Runtime operated on $O(1)$ time complexity for storing contents and $O(n)$ for rendering.

EXPERIENCE

Innovative Design, Berkeley, California USA

Gold Tier (Graphic Design)   **September, 2016 - Present**
Created graphic design illustrations as part of Innovative Design, a student-led creative agency. Worked personally with clients to develop logos and brand identity for on-campus organizations, such as the Educational Opportunity Program and the American Diabetes Association at Berkeley.
